

European Mortality Bulletin, week 14 2018:

Mortality has been significantly elevated in a large number of European countries over the past weeks/months. Elderly people have mostly been affected. Mortality has now declined in many countries, but still remains elevated in some.

Data from 21 countries or regions were included in this week's pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>

Pooled number of deaths

EuroMOMO: week 14, 2018

Participating countries:

Austria, Belgium, Denmark, Estonia, Finland, France, Germany (Berlin), Germany (Hesse), Greece, Hungary, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (Northern Ireland), UK (Scotland)
