

## **European Mortality Bulletin, week 31 2018:**

Pooled estimates of all-cause mortality show mortality at expected levels in the participating countries overall. However, there are signs of excess mortality in the Scandinavian countries, especially among the elderly, which could be related to the current heat wave in Northern Europe.

Data from 23 countries or regions were included in this week's pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>.

**Participating countries:**

Austria, Belgium, Denmark, Estonia, Finland, France, Germany (Berlin), Germany (Hesse), Greece, Hungary, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (England), UK (Scotland), UK (Wales)
