

European mortality bulletin week 39, 2011: Mortality has since the middle of January been within the normal range for all countries.

Over the last month, all-cause number of deaths, corrected for delay in local reporting of deaths, has been below 2 z-scores. We had previously reported an increased number of deaths over the last month. This was due to the adjustment in delay, and has now normalised.

EuroMOMO: week 39 year 2011

EuroMOMO: week 39 year 2011

The analyses, based on eight countries, were adjusted for differences in local delay of reporting and heterogeneities in pattern and variation between the included countries.
