

European mortality bulletin week 46, 2011: Mortality has since the middle of January 2011 been within the normal range for all countries.

Over the last months, all-cause number of deaths, corrected for delay in local reporting of deaths, has been below 2 z-scores. Over the past few weeks number of deaths tends to be slightly below the expected number among adults (15-64 years of age).

The analyses, based on ten countries, were adjusted for differences in local delay of reporting and heterogeneities in pattern and variation between the included countries.
