

European mortality bulletin week 49, 2011: Mortality is within the range normally expected at this time of season for all countries

Over the last months, all-cause number of deaths, corrected for delay in local reporting of deaths, has been below 2 z-scores. The low number of deaths in the present week might result from artefacts related to delay correction. In most countries, correction for delay is reliable after 2 to 3 weeks.

EuroMOMO: week 49 year 2011

EuroMOMO: week 49 year 2011

The analyses, based on eleven countries, were adjusted for differences in local delay of reporting and heterogeneities in pattern and variation between the included countries.
