

European mortality bulletin week 27, 2012: Pooled all-cause mortality has over the past weeks been within the expected range. Mortality among the elderly (aged 65 or more) has been high compared to the expected range for this time of the season but limited to a few countries (most of the grey lines are around 0 on the z-score graph). The rise in the last three week is probably mainly due to delay adjustment.

EuroMOMO: week 27 year 2012

EuroMOMO: week 27 year 2012

The pooled analyses, based on ten countries, were adjusted for differences in local delay of reporting and heterogeneities in pattern and variation between the included countries.
