

European mortality bulletin week 28, 2012: Pooled all-cause mortality has over the past weeks been within the expected range for all age groups except among the elderly (aged 65 or more), where mortality has been high compared to the expected range for this time of the season, but limited to a few countries (most of the grey lines are around 0 on the z-score graph). The rise over the last three week is probably mainly due to delay adjustment.

EuroMOMO: week 28 year 2012

EuroMOMO: week 28 year 2012

The pooled analyses, based on nine countries, were adjusted for differences in local delay of reporting and heterogeneities in pattern and variation between the included countries.
