

**European Mortality Bulletin, week 36, 2017:**

Levels of all-cause mortality have generally been within normal ranges in the past few weeks in the participating European countries.

Data from 20 countries or regions were included in this week's pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>

### Pooled number of deaths

EuroMOMO: week 36, 2017

— Stratified baseline      — Delay-adjusted number of deaths  
- - - Normal range (+/- 2 z-scores)      . . . Substantial increase (4 z-scores)

#### Participating countries:

Belgium, Denmark, Estonia, Finland, France, Germany (Berlin), Greece, Hungary, Ireland, Italy, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (England), UK (Scotland), UK (Wales)
