

European Mortality Bulletin, week 2, 2018:

There have over the past weeks been an increased mortality among the elderly, especially in the Southwestern part of Europe and in Scotland.

Data from 20 countries or regions were included in this week's pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>

Pooled number of deaths

EuroMOMO: week 2, 2018

Participating countries:

Belgium, Denmark, Estonia, Finland, France, Germany (Berlin), Greece, Hungary, Ireland, Italy, Malta, Netherlands, Norway, Portugal, Spain, Sweden, UK (England), UK (Northern Ireland), UK (Scotland), UK (Wales)
