

European Mortality Bulletin, week 17 2018:

Over the past months, mortality has been significantly elevated in many European countries, mainly affecting elderly people. However, mortality has returned to normal expected levels in all the participating countries.

Data from 22 countries or regions were included in this week's pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>

Pooled number of deaths

EuroMOMO: week 17, 2018

Participating countries:

Austria, Belgium, Denmark, Estonia, Finland, France, Germany (Berlin), Germany (Hesse), Greece, Hungary, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (Northern Ireland), UK (Scotland)
