

European Mortality Bulletin, week 32 2018:

Pooled estimates of all-cause mortality show mortality levels within expected ranges in the participating countries overall. However, there are excess mortality in some countries, in particular among the elderly, which could be related to the current/recent heat waves in Europe.

Data from 21 countries or regions were included in this week's pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>.

Pooled number of deaths

EuroMOMO: week 32, 2018

Participating countries:

Austria, Belgium, Denmark, Estonia, Finland, France, Germany (Hesse), Greece, Hungary, Ireland, Italy, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (England), UK (Scotland), UK (Wales)
