

### European Mortality Bulletin, week 13, 2020:

Pooled estimates from the EuroMOMO network show excess all-cause mortality, overall, for the participating countries; however, this pooled excess mortality is driven by a particularly high excess mortality in some countries, primarily seen in the age group of 65 years and above.

Data from 24 participating countries or regions were included in this week’s pooled analysis of all-cause mortality in Europe.

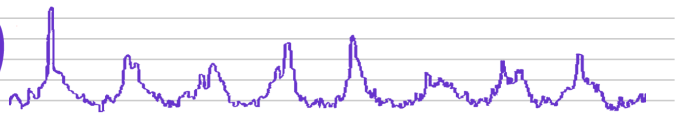

The number of deaths in the recent weeks should be interpreted with caution as adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>.

### Week 13, 2020

EuroMOMO. Week of study: 13, 2020

Must be interpreted with caution as adjustments for delayed registrations may be imprecise

### Pooled number of deaths

EuroMOMO: week 13, 2020
